

## Underpacking material

---

# Finito®

## Underpacking for printing blankets

### Application

- Calibrated underlay foil for offset presses
- Core structure: thermoplastic polyurethane (TPU) calendered to PES film (polyester)
- Adhesive and Non-Adhesive execution

### Key Facts

- Offers better mechanical stress resistance and print quality
- Better uniformity and stability, no stripe forming
- Self-levelling, with a high capacity to adapt to the profile of the cylinder
- Long lasting, solvent resistant
- Different thicknesses available, individually matched to your press

### Technical specifications

Thickness            Finito S - NON ADHESIVE 0,35 - 1,05 mm  
                          Finito B - NON ADHESIVE 1,30 mm | 1,40 mm | 1,45 mm | 1,50 mm  
                          Finito W - SELF-ADHESIVE 0,35 - 1,15 mm

Surface colour:    Finito S - green  
                          Finito B - green  
                          Finito W - red

Cylinder side:     Finito S - polyester side  
                          Finito B - blue side  
                          Finito W - adhesive side

Surface roughness: very smooth

Hardness (Shore A): Finito S - 76 Shore A  
                          Finito B - 86 Shore A  
                          Finito W - 76 Shore A
